

OPENVALUE

**Better
Training,
Faster**

At OpenValue, we love to share our knowledge at meetups and conferences. Next to that, we provide trainings and workshops. These are led by our experts that have hands-on project experience.

The highlights from our catalogue

Software Architecture

The 4-day “Certified Professional for Software Architecture - Foundation Level” training is designed to develop practical software architecture skills with hands-on exercises and real-world case studies. iSAQB exam and certificate included. *OpenValue is an official iSAQB training provider*

Java OCP exam class

Unlock your potential with our 10, 15 or 20 week course tailored for all developers who want to master Java. Prepare for the OCP Java SE 21 certification through weekly sessions, hands-on assignments, and personalized mentorship.

The Road to Tech Leadership

Elevate your career with our 2-day training for senior developers transitioning to tech leads. Master leadership, stakeholder management, and technical vision with theory, discussions, and case studies. Hosted by our experienced tech leaders from the Java community.

Starting with Public Speaking

A hands-on course designed for developers ready to shine at conferences, meetups or internal presentations. Engage in 2x4-hour sessions packed with hands-on practice and expert feedback to take the stage with confidence. No speaking experience required. Hosted by international conference speakers

AI Integration for Developers

A 2-day course for Java developers to integrate AI using tools like GitHub Copilot, Claude Code, and LLMs. Learn to implement AI features and deploy AI-enhanced solutions. Become the critical expert of AI automation and Agentic AI in your organization!

& many more...
